

OCLN Polyclonal Antibody

Catalog No BYab-07715 Isotype IgG Reactivity Human;Mouse;Rat Applications WB IF;ELISA Gene Name OCLN Protein Name Occludin;OCN Immunogen Synthesized peptide derived from part region of human protein. AA350-400 Specificity OCLN Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 IF 1:100-300 ELISA 1:5000-20000 Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Solicity (Strategy of the polithelial and endothelial cells, Highly expressed in kidney, Not detected in testis. Function Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney, Not detected in testis. Function Protein complex assembly, cellular amino acid derivative metabolic process, purine nucleoside metabolic process, inbonucleoside metabolic process, inconnolecular c		
Reactivity Human;Mouse;Rat Applications WB IF;ELISA Gene Name OCLN Protein Name Occludin;OCN Immunogen Synthesized peptide derived from part region of human protein. Synonyms Observed Band 57kD Cell Pathway Cell membrane; Multi-pass membrane protein. Cell junction, tight junction. Tissue Specificity Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney. Not detected in testis. Function protein complex assembly, cellular amino acid derivative metabolic process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, Background This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Concentration	• •
Synonyms Synonyms S7kD	Purity	≥90%
Observed Band Cell Pathway Cell membrane; Multi-pass membrane protein. Cell junction, tight junction. Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney. Not detected in testis. Function protein complex assembly, cellular amino acid derivative metabolic process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, Background This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Storage Stability	-20°C/1 year
Cell Pathway Cell membrane; Multi-pass membrane protein. Cell junction, tight junction. Tissue Specificity Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney. Not detected in testis. Function protein complex assembly, cellular amino acid derivative metabolic process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Synonyms	
Tissue Specificity Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney. Not detected in testis. Function protein complex assembly, cellular amino acid derivative metabolic process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Observed Band	57kD
Expressed in kidney. Not detected in testis. Function protein complex assembly, cellular amino acid derivative metabolic process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, Background This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Cell Pathway	Cell membrane ; Multi-pass membrane protein . Cell junction, tight junction .
process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex biogenesis, Background This gene encodes an integral membrane protein that is required for cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Tissue Specificity	Localized at tight junctions of both epithelial and endothelial cells. Highly expressed in kidney. Not detected in testis.
cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with	Function	process, sulfur metabolic process, nucleoside metabolic process, ribonucleoside metabolic process, purine nucleoside metabolic process, macromolecular complex subunit organization, purine ribonucleoside metabolic process, S-adenosylhomocysteine metabolic process, S-adenosylmethionine metabolic process, macromolecular complex assembly, protein complex
	Background	cytokine-induced regulation of the tight junction paracellular permeability barrier. Mutations in this gene are thought to be a cause of band-like calcification with
