

CKR-5 Polyclonal Antibody

Catalog No BYab-13758 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB;IHC;IF;ELISA Gene Name CCR5 CMKBR5 Protein Name C-C chemokine receptor type 5 (C-C CKR-5) (CC-CKR-5) (CCR-5) (CCR5) (CHEMR13) (HIV-1 fusion coreceptor) (CD antigen CD195) Immunogen Synthetic peptide from human protein at AA range: 151-200 Specificity The antibody detects endogenous CKR-5 Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000,IHC-p 1:500-200, ELISA 1:10000-20000. IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms C-C chemokine receptor type 5 (C-C CKR-5;CCR5;CHEMR13;HIV-1 fusion coreceptor;CD antigen CD195) Observed Band 40kD Cell Pathway Cell membrane; Multi-pass membrane protein. Tissue Specificity Highly expressed in spleen, tymus, in the myeloid cell line THP-1, in the promyeloblastic cell line KG		
Reactivity Human;Rat;Mouse; Applications WB;IHC;IF;ELISA Gene Name CCR5 CMKBR5 Protein Name C-C chemokine receptor type 5 (C-C CKR-5) (CC-CKR-5) (CCR-5) (CCR5) (CHEMR13) (HIV-1 fusion coreceptor) (CD antigen CD195) Immunogen Synthetic peptide from human protein at AA range: 151-200 Specificity The antibody detects endogenous CKR-5 Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. 	proliferation or differentiation. Acts as a coreceptor (CD4 being the primary receptor) for HIV-1 R5 isolates.,online information:CC chemokine receptors entry,online information:CCR5 receptor entry,polymorphism:Ser-60 variant, a naturally occurring mutation in a conserved residue in the first i
Background	This gene encodes a member of the beta chemokine receptor family, which is predicted to be a seven transmembrane protein similar to G protein-coupled receptors. This protein is expressed by T cells and macrophages, and is known to be an important co-receptor for macrophage-tropic virus, including HIV, to enter host cells. Defective alleles of this gene have been associated with the HIV infection resistance. The ligands of this receptor include monocyte chemoattractant protein 2 (MCP-2), macrophage inflammatory protein 1 alpha (MIP-1 alpha), macrophage inflammatory protein 1 beta (MIP-1 beta) and regulated on activation normal T expressed and secreted protein (RANTES). Expression of this gene was also detected in a promyeloblastic cell line, suggesting that this protein may play a role in granulocyte lineage proliferation and differentiation. This gene is located at the chemok
